WEATHER REPORT.

INDICATIONS FOR SUNDAY .- For the South Atlantic States, clear or partly cloudy wea-ther, southwest winds veering to northwest, stationary or higher temperature, rising barometer.
For the Middle Atlantic States, partly

cloudy weather in the northern portions, occasional light snows, west winds veering to colder northwest, higher barometer.

THE WEATHER SATURDAY Was clear, cool,

The Chinese Must Go. AN UNEQUAL BARGAIN.

can people are facts that will scarcely be questioned. In that compact we give a great deal more than we receive. For instance, we throw our doors wide open for the admission of immigrants from a country whose population is so vast that millions would make no perceptible diminution. We offer them the same advantages that belong to our own people—such facility. stance, we throw our doors wide open for

We take them into the American family and they become joint heirs with us in the grandest inheritance on the globe. For the sun shines on no other land, and since time began has never illuminated any region, where life—the privilege of fiving—has been or is worth half what it is to each inhabitant or is worth half what it is worth half what is worth half what it is worth half what i of this continent, and especially that portion of the continent which constitutes the 25 and 30c. per dozen; lemons, 25 to 30c. Feat

The conditions of existence, the blessing of individual liberty, the chances we evjoy for obtaining wealth, social distinction, and political preferment, our exception from the oppression of despotism and the cruelty of caste, the measureless resources of our country in all the great elements of material progress—these are some of the reasons why it is a vast privilege for the people of any other land to be adopted into the American for the Virginia and North Carolina Telegraph Company, has been appointed superintendent, and J. D. Tracy assistant superintendent, of the Southern Bell Telegraph Company, in charge of the Telegraph Company Comp

But as compared with Asia, and especially with the Chinese Empire, this land of ours is as a palace to a boyel, a feast to famine, affluence to penury, hope to despair.

And we have swung our front gate open, by the Burlingame treaty, and said to the mond College held last Friday night the In regard to the necessary changes at the Richard side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumanism the arm. The stomach is affected with loss given to each emigrant the same rights that costive, sometimes alternative with lax; the head is divide the estate with them, and make them nominating speeches made, and an election our brothers. There is not a foot of our domain from which they are excluded. Our result: Total number of votes cast, 68; of courts have made them voters, and they are eligible to any office except the two at the |den, 2; Seymour, 2; and Hancock, 1. Some top of the official ladder.

And what do we get in return? What of wearings and debility; he is easily startled, his tion for this most munificent gift? Is her nominated him said that Bayard, if elected, territory opened up for Americans in case they should wish to go there and become citizens? Is there any real advantage gainand although he is satisfied that exercise would be ed by us except a few rights of trade that beneficial to him, yet he can scarcely summon up we should have if no such treaty existed? fortitude enough to try it. In fact, he distrusts every Is not the Empire, except a few ports, sealas effectually excluded from China now as if we could go all over the Empire in peace and stay where we pleased, does it offer any advantage? No, it is a wretched, overcan cares to live, except for trade in a few

of its products. We do not want to exchange some thou-sands of Americans for the same or a greater number of Chinese. Experience has shown that these Asiatic immigrants are a most undesirable acquisition. We do not want to degrade the labor or the life of mitted. cur working people to the Chinese level of bestinlity. We do not want to introduce the vileness and the loathsome babits of these people into our country. We have learned what they are, seen how they live,

and can easily foretell the result of a vasc influx of their countrymen. The trea'y, while it stands, must be fulfilled, but it cannot be too soon abrogated as to most of its provisions. We must see that this country shall not be overrun with a turbid tide of Asiatic degradation. China has shown us how to do this by fixing upon certain ports where Americans may enter and certain places where, under defined conditions, they may reside. In any new treaty with that Empire we must follow this example. If we have any single right as a people it is that of self-protection, and under this right we are bound to say that the millions of Asia shall not occupy this

country or come here in such numbers as to a new treaty with China will soon be ap-pointed. It should begin with a fair un-derstanding that China is incapable of giving us much that we would not pessess were there no international compact; that China is too exclusive to fairly claim standing with treaty-making powers; that we are ready to extend our commercial rela-tions on fair terms, but don't intend to adopt and take home the miserable millions of that God-forsaken land.

FURNISHING TIME AS GAS AND WATER ARE SUPPLIED. - Paris, March 13. - Paris clocks bave long afforded a subject of ridicule to foreigners. In a few days there will be no room for derision. Within the last week bandsome public illuminated time-pieces have been erected in the middle of the causeway of the leading thoroughfares. These are all in communication with the works of the new Pneumatic Clock Com-pany, in the Rue St. Anne. By means of subterranean tubes this company receives the time direct from the Observatoire every morning, and regulates all the time-pieces in connection simultaneously. In future it will be possible to have the correct time laid on in any house, like gas or water, at the trifling cost of from three to five centimes per clock per day. I was allowed to inspect the company's premises privately today, and examined the whole arrangements. The air is compressed by steam-engines, and driven at intervals of a minute through and driven at intervals of a minute through the communicating tubes so as to move the minute-hand, the requisite distance at each pulsation. It can be applied to any clock. The company undertakes to pay all the cost of the fittings. It supplies clocks gratultously, and charges only a subscription. By this new system all trouble of repairing and winding up is done away with. Over one thousand pneumatic clocks are ordered in Paris already, and will soon be tested at New York, where the patent for America has been purchased.

LOCAL MATTERS.

FAMILY MARKETING-RETAIL PRICES. The following were the prevailing prices for Jamily marketing on Saturday:

Becf, 8, 12½, and 15c. per pound; mutton, 10 to 12c. per pound; chops, 10 to 12½c. per pound; yeal, 10 to 15c. per pound; pork, 10c. per pound; seal, 10 to 15c. per pound; pork, 10c.

bic yard—the contract prices of the year before being 18 cents to 25 cents per cubic yard. So much is dependent upon the permanent grading of streets as a basis upon which all other improvements should be made that I must urge the necessity for increasing this part of our city work beyond what it has been heretofore. Especially should this be done in the case of the Church-Hill avenue, where is large amount of work remains to be done, and which needs to be flaished before the benefits from these improvements can be realized.

Miss Lottie Price, Misses Jane and Helen Rutherfoord, Mrs. Pembrdke Jones, and Misses Morris, Fairfax, Daniel, and Stew-art—pupils of Miss Laird, of Richmond—contributed to the exhibition some of their work, consisting of water-color paintings, pencil- and crayon-drawings, which attracted not a little attention. "Dryburgh Abbey," a water-color painting by Miss Maria Stewart, of Richmond, deserves special notice.

Mr. C. H. Read, Jr., exhibits an arctiteentural design of the United States Soldiers' Home at Washington.

hese improvements can be realized. The Engineer further says: A large amount of repuving is needed upon some of our business streets, especially where the rough cobble-stone paving exists, and should be replaced with granite. Special provision should be made for this work. More attention should be given to cleaning, and in dry weather to sprinkling the streets, as the increasing traffic upon them is now producing such an accumulation of mud and dust as will soon become a nuisance. will be increased by the hauling of freight to the Richmond, Fredericksburg and Potomac railroad de; ôt, located on west Broad
